

WORKSHOPS AND TRADE EVENTS

transaction cycle must comply with the regulations on electricity market operation). EVN proposes MOIT not to assign EVN to negotiate electricity prices and PPA for these projects.

2/ In long-term period, EVN proposes the bidding mechanisms in two steps:

(i) Selecting the investors in accordance with the new investment law with the decision of investment policy with a certain term. After a prescribed period, if the investor does not implement the project, the competent state agency has the right to collect the project for assigning the other investors.

(ii) Investors should be selected to participate in the electricity market, or participate in bidding for signing PPA and developing the project; The bidding unit is MOIT.

Secondly, regarding MOIT proposal on reviewing the contracts between EVN and the investors in order to harmonize the benefits between the electricity seller, buyer, consumer and the state for the projects in commercial operation.

EVN considers that PPAs currently signed are the sample PPAs issued by MOIT with basing the Commercial, Electricity and Civil Laws, EVN proposes to cancel or regulate content of PPA must base the clauses of signed PPA and the above laws.
