

PRODUCT CERTIFICATIONS

Satisfied OEKO-TEX 100 standard

Fabric Certification: Antimicrobial Test reported by Vietnam Textile Research Institute - JSC.
 Product certification: Certification of Conformity with Vietnam National Technical QCVN 01:2017/BCT, issued by Vietnam Textile Research Institute - JSC.
 Product certification: Ministry of Health Certification.
Certificate of Origin: Product satisfies Rules of Origin under CPTPP, EVFTA

PACKAGE

5 pieces/small box
 1 Carton 600 pcs, measurment 45x35x50 cm = 0.78 cubic meters, weight 13,8kg/carton.
 Package for export: On request.

MANUAL

Outer surface (logo on the surface) is to prevent droplet, dust and penetration of other hazardous bacteria.

The inner bacterial ply can prevent bacteria and best use in 30 times laundry or 3 months from the first use.

Can be washed by hand, dried in the shade or iron for reuse. Antibacterial effect will fade away counting by washing cycles and the number of days used.

Recommend using: In the public area.

**VIETNAM NATIONAL
 TEXTILE AND GARMENT GROUP**
 VINATEX FASHION CENTER

**3-PLY DROPLET RESISTANT,
 ANTIBACTERIAL
 FABRIC MASK**

Following requirements of Decision No. 870/QĐ-BYT of Vietnam Ministry of Health

Satisfied OEKO-TEX 100 standard

- Preventing airborne particles and droplet containing virus, bacteria
 National Institute of Medical device and Construction
- Antibacterial layer satisfied AATCC 100-2012 standard
 Vietnam Textile Research Institute Tested

**25th Anniversary of Establishment
 Vietnam National Textile and Garment Group**

PRODUCER AND DISTRIBUTOR

Produced and distributed by:
 Vietnam National Textile and Garment Group (Vinatex).

TECHNICAL SPECIFICATIONS

Made of woven fabric, silver nano technology, droplet-resistant, anti-bacteria by Dong Phuong Knitting Co.

Made of smooth knitted antibacterial cotton fabric

Fabric:

100% cotton.

Respiratory force of 5mm water with air flow capacity of 30 liters / minute, while with the standard is less than 9mm water. Enable normal breathing.

Designed to reduce the risk of inhaling hazardous airborne particles.

The fiber is treated specially with high weaving technology in order to make the fabric soft strictly meet the Decision No. 870/QĐ-BYT / QĐ -BYT on the technical requirements of the epidemic masks in the community.

FUNCTION

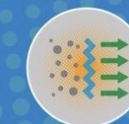

Droplet-resistant

Antimicrobial

Filter dust, deodorant
