

TH GROUP AND TH FARM

TH Group's briefing

Since the very first days, TH group has meditated upon bringing about the nature's pure and fine values to contribute to the physical and mental improvements of the people of Viet Nam; TH Group is determined to enrich the country, defining its own benefits in line with the country's ones. This mediated vision is the momentum on which a noble mission "For Vietnamese Statue" has thrived on to join hearts and minds for the development of the next generations of Viet Nam.

With such, each of TH's products introduced to the market is entrusted with the meaningful mission "For Vietnamese Statue". TH has launched a chain of dairy products purely made from the fresh milk of TH farm, from its first products branded as fresh and clean TH true MILK to the Natural Yogurt TH true YOGURT, Natural Cheese TH true CHEESE, Natural Unsalted Butter TH true BUTTER which are not only fresh, tasty and nutritious, but also digestive supporting and immune boosting to help improve physical and intellectual development for a happy and healthy life.

TH is true happiness.

TH Farm

A centralized and industrialized dairy farming system, allowing for cutting-edge farming processes and herd management. The dairy cows enjoy music and are well treated with fresh clean water and daily bathing...

Scale: 1200 Million USD

Cow herd: Over 45,000 dairy cows up to now

Area: 37,000 ha of land

TH Group has been the leading supplier of fresh and clean milk in Viet Nam

TH GROUP PIONEERS IN ORGANIC MILK DEVELOPMENT IN VIET NAM

TH has been recognized as the first enterprise taking lead in signing agreement to apply organic dairy farming and production according to the Organic Standards of the Europe and the US. TH's farm has been the only in Viet Nam having thousands of cows being converted to organic farming according to a closed process from grass to glass, meeting the European Organic standards and being rewarded with Golden Cup for Organic Dairy farm for Public Health Benefits.

TH trueMILK Organic

ORGANIC COWS	ORGANIC FEED	ORGANIC PASTURE	HERD MANAGEMENT	HEALTHCARE	MILKING	ORGANIC PRODUCTION
TH- the first dairy farming business has converted the existing cows to organic ones.	Organic field crops at TH farm, no pesticides, no chemical fertilizers, non-GMO.	Grazing farming on organic pastures, cows feel relaxed with nature.	Applying the most advanced herd management of Afifarm. Cows have chips at their legs for monitoring health status, nutrition and milk production.	Applying natural health care methods with herbs, no antibiotics, no stimulation hormones.	Milking system is automated to ensure the highest requirements of hygiene.	Closed production strictly complying with European organic standards.

TH⁺ true WATER

Natural groundwater
Natural purified water

NATURAL GROUNDWATER

Above an extinct volcano in midland Nghe An province formed millions of years ago named Fairy Mountain, fresh clouds bring tropical rain to freshen a pristine vegetation. The rainwater then runs through myriad levels of olivine basalt, filtered out all residual and impurity, to finally become natural and fresh spring of groundwater. Thousands of years passed, it is isolated from surrounding environment by the basalt rock to become so pure, so fresh, and totally drinkable*.

(* In accordance with Groundwater Reserve Survey and Assessment Report 2018 supplied by Northern Central Region Water Resources Team, Ministry of Environment and Natural Resources.

Ultrafiltration (UF) and Reverse Osmosis (RO) technologies from Germany

- . Totally automated, end-to-end production line, synchronized from treatment, filling to bottling.

Empowered with the ambition to supply consumers with fresh, clean, nourishing and safe fruits and vegetables, FVF targets to be one of the leading exporters of fresh agricultural products, positioning Vietnamese vegetable brand in the global market. The project of Cultivation and Export Fresh Vegetables applies a strict management process from cultivation to distribution of vegetables, from farm to plate for every household to enjoy the natural goodness in varied products. The company does not only make a considerable contribution to environment protection but also proactively applies synchronized high technological agriculture model.

FVF is also known as the pioneer of organic agriculture – a system that strive to provide consumers with clean, delicious and authentic foods while practice system producing naturally. Statistic show that consumers in the US and European countries are more concerned in their health when using organic products under any circumstances. FVF plans to gain market share of certified organic products of Vietnam and penetrates into Asia market in the coming years.

ADVANCED TECHNOLOGY PRODUCTION MODEL

1. SAPLING NURSERY

Breeding selection is strictly controlled in accordance with relevant standards

Total area of the sapling nursery is 0.3 hectare, equipped with the high-end technology to complete seedling planting to the whole farm

3. NUTRITION & IRRIGATION

The Farm applies strict quality management with clean water source and completely nutrients to help vegetables grow naturally.

Irrigation fertilizer system offers nutritional component plans according to growth stages, seasons and other factors.

2. CULTIVATION AREA 2.1. GREEN HOUSE

Green house is designed and built with materials which can withstand climate change and control pest in order to achieve high yield

Semi-hydroponics environment consists of tray or bags containing inertic to reduce environmental pollution

4. PRIMARY PROCESSING

Harvested at the right time, the best products are chosen for primary processing with automated production lines.

Products are packed in convenient containers and preserved with high-end technology

2. CULTIVATION AREA 2.2. OPEN FIELD

In open field, the soil must meet basic requirements of being free from use of prohibited substances (synthetic chemicals, etc.) for a number of years.

Crop rotation and other forms of husbandry are applied to maintain soil fertility

5. DISTRIBUTION

After dedicatedly transported, FVF products are distributed through FVF's own showrooms and the nationwide supermarket systems named BigC, Aeon, Auchan, Maximark, etc.

Every product is attached with traceability label to show the "product dairy" via SMS, website and mobile app.
