FILTER STRUCTURE  
4 LAYERS

# COMPONENT DETAILS

1

## PP FRONT COVER

---

Use friendly and safe PP plastic materials.

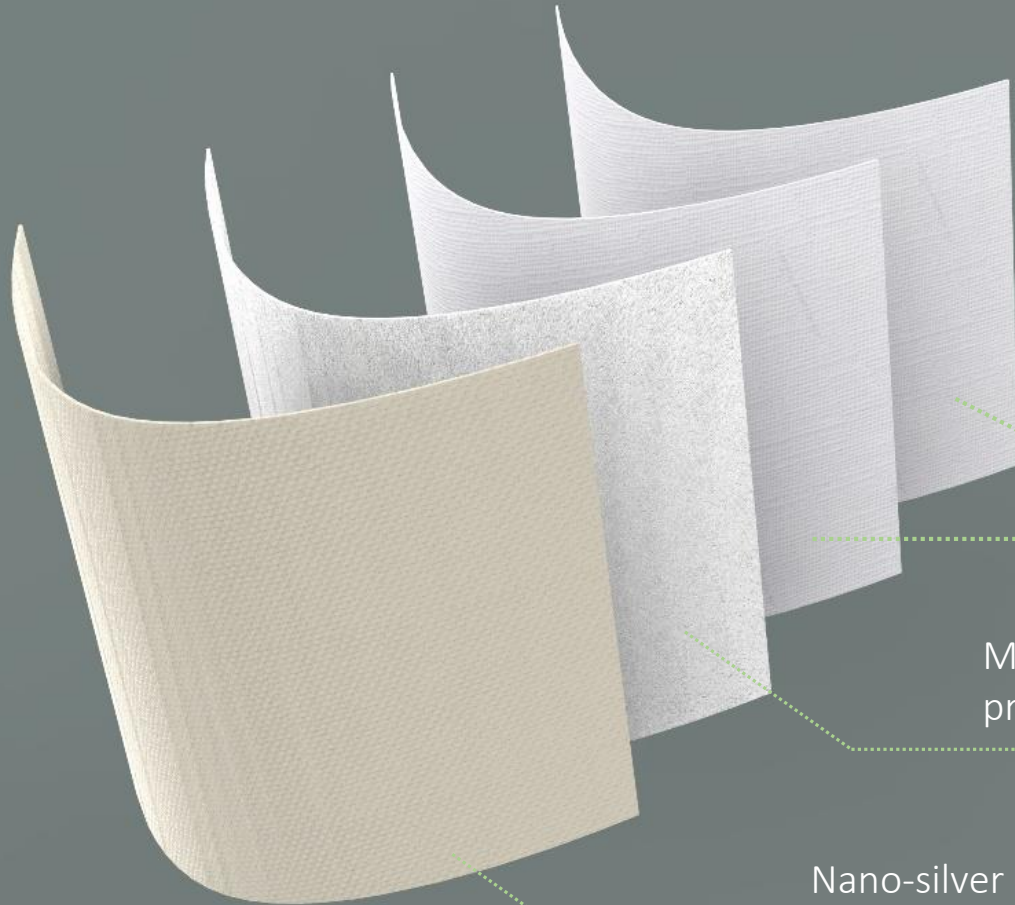

Strong concept design, which is never been on the market.

2

4-LAYER

FILTER

Nonwoven fabric to prevent moisture and waterproof x 2

Melt blown with high density to prevent bacteria from invading

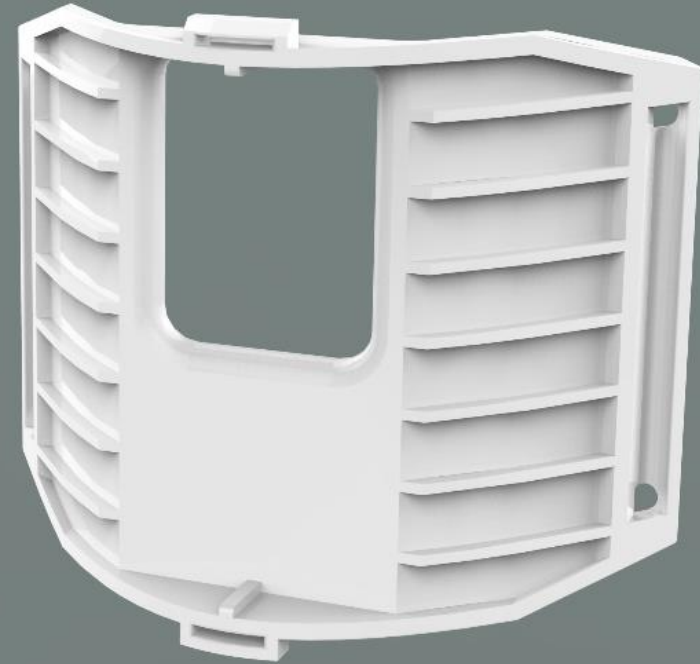

Nano-silver coated fabric to kill up to 99% of virus and bacteria

3

## CLAMP PLATE

---

PP plastic plate with a curved shape to fix the position of the filter to prevent wrinkling.

4

## TPE MOUSE & NOSE COVER

---

The soft silicon cover made of TPE plastic which is very safe for users and environmentally friendly.

With a tight grip on the nose and mouth, it helps prevent unfiltered air from passing through.
