

# ORGANIC CARBON

JV Smart Future

# NEMA2

» IT RENOVATES AND ENRICHES NUTRITIONS OF SOIL AND FERTILIZER

» IT INCREASES ITSELF ANTIBODY, PRODUCTIVITY AND QUALITY OF AGRICULTURE PRODUCTS

## NEMA2'S APPLICATIONS

Improved quality of composting. It helps to deodorize the odors, to shorten compost's time. It chases flies out, increases the fertility of soil. It helps to create good compost.

Neutralized the PH of soil. Renovated the nutrition of soil. Recovered and increased Aminoacid / Acid Amin. Improved the immune system that helps plants to prevent the diseases and cruel environment then they can give better quality and productivity of agriculture products.

It helps seeds germinate well and enhance against the pestilences.

Reduced the excess chemical fertilisers which contained in soil, plants, fruits or vegetables

**NEMA2 HAS ORGANIC CERTIFICATION, APPROVED BY JAPANESE AGRICULTURAL STANDARD ASSOCIATION**

## WHAT IS NEMA2?

Nema2 is Organic Carbon, manufactured by JAPAN VIETNAM SMART FUTURE JSC., It is 100% nature. It is not only safe but also healthy for humans, animals and plants. Its main ingredient is Atomic Carbon which PH is more than 8, antioxidant, non-conduction...

It is 100% nature

It increases antibody of useful microorganism

High PH (>8.0)

Improved the immune system that helps plants to prevent the diseases and cruel environment then they can give better quality and productivity of agriculture products.

Nema2 removes effectively daily life odors and chases harmful insects

Organic carbon - Nema2 is safe for humans and animals.

### RENOVATION OF SOIL DEVELOPMENT

- Dissolved 1-2Kg Nema2 with water to apply for 1 hectare. It'd better use before plowing. From the second year, used half of this dosage.
- 1kg Nema2 dissolves with 1m<sup>3</sup> – 10m<sup>3</sup>. The more water the more scatter can be easy.

### IMPROVED THE IMMUNE SYSTEM OF PLANTS, INCREASED QUALITY AND PRODUCTIVITY OF AGRICULTURE PRODUCTS

- Dissolved 1-2KG Nema2 with water to apply for 1 hectare. - Sprayed on the trees, leaves, buds, fruits and on the roots.
- Took 3 turns per time, 1 time per month.
- 1kg Nema2 dissolves with 1m<sup>3</sup> – 10m<sup>3</sup>. The more water the more scatter can be easy.

## JV Smart Future

**NEMA2 HAS ORGANIC CERTIFICATION, APPROVED BY JAPANESE AGRICULTURAL STANDARD ASSOCIATION**

### IMPROVED COMPOSTING, DEODORIZED THE ODORS

- Dissolved 100gram Nema2 with 500 Liter-water for 5 Metric Tons of Dung. (We can change the quantity of water or method so that Nema can scatter well).
- Sprayed on the organic fertilizer, mixed together and composted from 30-45 days.
- Repeated this process after 3 weeks if necessary.

### INCREASED THE GERMINATION OF SEEDS

- Dissolve 10gram (or 2 spoonful) into 100 Liter water.
- Soaking seeds during 5-6 hours then cultivated seeds after drying.
- For saplings: soaking their roots about 20-30 minutes before cultivating.
