FARM BASE — DONG NAI

POST-HARVEST WASHING

EXPORT LOADING

Chau Thanh Agri Vision is an export-oriented agricultural enterprise providing technical farming processes and offtake partnerships for external farms — building a scalable banana supply base for Korea, Japan, China, the Middle East and other markets.

We do not only trade. We equip farms with process, inputs and a committed offtake channel, so produce meets export standards at scale — from the first assessment visit to the sealed container.

TECHNICAL PROCESS**Clean farming protocols**

Protocols and bio-inputs applied and verified at partner farms.

OFFTAKE LINKAGE**Long-term contracts**

Committed purchase from external farms — clear terms, transparent payment.

EXPORT SCALE**Four priority markets**

Korea, Japan, China, Middle East — an expandable supply network.

Cavendish bunches in the field — export-grade practice at a linked farm, Dong Nai.

A fully registered Vietnamese enterprise with clear legal representation and authorized signatories — so contracts, payments and shipping documents always trace to accountable people.

FULL LEGAL NAME	Chau Thanh Production Trading & Import-Export Co., Ltd.
BRAND	Chau Thanh Agri Vision
TAX / BUSINESS ID	3603880423
REGISTERED ADDRESS	Group 12, Vinh Hiep Hamlet, Tan Trieu Ward, Dong Nai City, Vietnam
LEGAL REPRESENTATIVE	Mrs. Ngo Hoang Ngoc Chau — Director
AUTHORIZED SIGNATORY	Mr. Ngo Minh Hoang — Deputy Director (POA No. 01/UQ-CT/2026)
HOTLINE	0908 521 365
PHONE	097 135 3150 — Mr. Hoang
WEBSITE	www.chauthanhagrivision.com

Verification welcome — business registration, power of attorney and export documentation are available to partners on request.

01

Technical Process

We supply farming protocols, inputs and on-site guidance so external farms meet export-grade standards — from field hygiene and bunch bagging to harvest timing.

→ What buyers get: consistent, auditable field practice behind every box.

02

Offtake for Farms

Long-term offtake for partner farms. Clear contracts, transparent payment settled in full before container departure — farms stay committed to quality.

→ What buyers get: a stable, motivated grower base that doesn't switch away mid-season.

03

Export Network

Korea, Japan, China, Middle East. Scalable supply from linked farms across production regions, coordinated to destination-market standards.

→ What buyers get: volume that scales without losing grade consistency.

Aerial view — linked banana plantations, Dong Nai province, Vietnam.

Current linked base in Dong Nai

~4,000 t

Estimated exportable volume per year

1,000+ ha

Offtake model ready to scale through partnership

WHY DONG NAI

Basaltic red soil, a long dry season and established farm infrastructure — with direct road access to Ho Chi Minh City ports for short, cold-chain-friendly transit.

The linked-farm model concentrates technical supervision while spreading production across plots and harvest windows.

Left: bagged bunches at harvest gauge. Right: banded clusters on foam liner before boxing.

PRODUCT SPECIFICATION

Product	Fresh Cavendish banana
Field practice	Bunch bagging, gauged harvest
Export carton	9 kg net, ventilated
Storage & transit	Reefer at 14 °C
Origin	Produce of Vietnam

QUALITY CONTROL POINTS

- 01 Harvest at destination-specific finger gauge and age
- 02 Visual grading — peel finish, cluster shape, defect limits
- 03 Wash-tank hygiene and crown treatment before packing
- 04 QC aligned to the destination market's import standard

3/3

INDEPENDENT TESTS PASSED

Three independent laboratory tests confirmed compliance with the Korea Ministry of Food and Drug Safety (MFDS) maximum residue limits for fresh banana.

De-handing and float-tank washing at the farm-side packing station.

STEP 01 – HARVEST

Bunches cut at export gauge, carried on padded lines to keep peel finish intact.

STEP 02 – WASH & DE-HAND

Hands separated and floated through wash tanks to remove latex and field debris.

STEP 03 – SORT & GRADE

Clusters cut and graded to the destination spec; off-grade fruit is separated out.

STEP 04 – TREAT & DRY

Crown treatment and drying before banding, weighing and packing into cartons.

Left: banded clusters between corrugated foam liners. Right: carton stock at the packhouse.

PACKING STANDARD

- 01 Clusters banded and labeled at the packing line — origin identified on every cluster.
- 02 Corrugated foam interleaves between layers prevent bruising and peel scarring in transit.
- 03 Perforated poly liner regulates humidity inside the carton through cold-chain transit.
- 04 Ventilated 9 kg net export cartons, printed to buyer specification — private label available.

Reefer container loaded farm-side and documented box by box before departure.

FARM-SIDE LOADING

Containers are loaded at the packing station — one less handling step, less bruising.

COLD CHAIN AT 14 °C

Reefer set-point held from stuffing through port transit to the destination market.

DOCUMENTED DEPARTURE

Loading is photographed and recorded; payment is settled in full before departure.

GULF ROUTES

Model: technical support + offtake for external farms — expandable to thousands of hectares through partnership.

The same disciplined loop runs behind every shipment — whether we are onboarding a new partner farm or opening a new destination market.

01**Assess & Advise**

Evaluate farm conditions and design a technical process for export grade — soil, water, variety, harvest windows.

02**Supply & Guide**

Provide inputs, protocols and on-site training for partner farms through the growing cycle.

03**Harvest & QC**

Quality control aligned with destination-market standards, from gauge check to grading table.

04**Offtake & Export**

Pack, load containers — full payment before departure — and ship to markets.

What partners can hold us to.

- 01 Technical processes that farms can apply and verify
- 02 Offtake commitments honored on quality and agreed volume
- 03 Transparent payment — settled in full before container departure
- 04 Scalable partnership model for external farms — hundreds to 1,000+ ha
- 05 Progressive shift toward cleaner inputs and export-ready practice
